PROFESSIONAL SUMMARY

I have already built this business. In 2024 I founded Cosmodata Strategy & Management — a Data & AI advisory practice I started from zero, running full P&L, winning clients through direct business development, and leading delivery end to end. In parallel I lead the Central Europe Data & AI Service Line at Thoughtworks: 54 consultants across three countries, accountable for commercial pipeline, service offering development, and engagement quality. I know the Data & AI consulting market, the buyers, and what good delivery looks like. I have a strong existing network across CDOs, Heads of Data & AI, and enterprise decision-makers — built through keynote speaking, community events, a published book series, and two years of senior advisory work. I am not starting from scratch. I am looking for the infrastructure and ecosystem to go faster and bigger than I can alone.
