PROFESSIONAL SUMMARY

I write the first version of the code myself. Then I scale it. Data and AI leader with 18+ years bootstrapping production-grade AI platforms, ML systems, and client-facing digital products from zero to revenue — in Python, SQL, GCP, LLMs, and cloud-native tooling, not just in decks. At Thoughtworks I lead the Central Europe Data & AI Service Line: 54 people across Romania, Amsterdam, and Germany, accountable for commercial development, delivery quality, and regional P&L. I built and commercialized an AI-powered ETL Migration Accelerator on GCP/Gemini — designed the architecture, wrote the core code, built the P&L and deal structures, and produced all sales enablement and ROI documentation. Active pipeline includes Humana.ai, HSBC, ING Bank, and Capital One. I speak at industry events and keynotes, co-authored a book series on Data Products, and teach live executive cohorts at O'Reilly. I don't delegate the hard technical work. I own it, drive it to market fit, and build the multidisciplinary team around it.
