PROFESSIONAL SUMMARY

I write the first version of the code myself. Then I scale it. Data and AI leader with 18+ years building production-grade data systems, AI platforms, and client-facing products from the ground up — in Python, SQL, GCP, and cloud-native tooling, not just in decks. At Thoughtworks I lead the Central Europe Data & AI Service Line: 54 people across Romania, Amsterdam, and Germany, accountable for commercial development, delivery quality, and regional P&L. I built and commercialized an AI-powered ETL Migration Accelerator on GCP/Gemini myself — designed the architecture, wrote the core code, built the P&L and deal structures, and produced all sales enablement materials. Active pipeline includes Humana.ai, HSBC, ING Bank, and Capital One. I speak at industry conferences, co-authored a book series on Data Products, and teach live executive cohorts at O'Reilly. I don't delegate the hard technical work. I own it.
